Gary - One of our staff I'm Houston drove over to see if any soil disturbance activity was occurring in the area south of I-10. She did not see any work going on in the former impoundment area.

Phil Slowiak also contacted Anthony Hunter, Assistant Fleeting Manager, Kirby Inland Marine (713) 435-1816. He said Southwest Shipyard is doing something on their property and there has been a stream of trucks coming out of there for over a week. He confirmed there is no excavation occurring on the Musgrove side of Market Street.

Thank you,
David

David,

Please see the note I just received: can you check and see if any soil removal is occurring in the Southern Impoundment?

Thanks,

Gary Miller

"Last night was our monthly Coalition meeting and I received an interesting comment by***** in Channelview. He said that over the past week he has witnessed dump trucks hauling off soil from the Southern impoundment. I asked him several times to verify the location and he is adamant that it was from the Southern Site."
